Technical excellence

- The pressed tile Mediteran Plus is used for pitched roofing
- Thanks to its double Falco feature offering great depth, this tile if placed correctly, provides better sealing of the roof surface, thus removing the risk of water seepage from rain, and remains unaffected by strong wind
- Stable at temperatures from - 40 ° C to + 100 ° C
- Sliding roof battens in the range of 33-35mm makes it ideal for replacement of existing roofing material
